

GANNON® MULTI- PURPOSE BUCKET

features

- 1 Heavy-duty moldboard construction provides long wear life and helps to reduce dents
- 2 Wear resistant edges on the front, clam and dozer wear surfaces (front and dozer are common and interchangeable)
- 3 High spill guards protect the operator and the tractor
- 4 Two rows of pre-drilled holes on the front edge accept bolt-on adapters or a reversible cutting edge
- 5 Rear enclosed hoses for protection in rugged conditions
- 6 Unique flush pin design allows for zero (0) clearance along wall in final grade stage
- 7 Heavy-duty, easy maintenance cylinder
- 8 Heavy-duty serrated end bit on clam wing for maximum grapple retention

Forty-five years of listening to our dealers and working with veteran operators has allowed us to develop tools that are matched to specific job requirements.

We now offer a comprehensive line of general purpose and multi-purpose (4-in-1) loader buckets for skid steers, compact tractors, tractor loader/backhoes, and articulated wheel loaders.

We pioneered the development of loader buckets for specific applications, using different shapes (profiles), and sizes (capacities and widths). We were awarded the first license agreement to manufacture and produce the original and patented 4-in-1 bucket from Drott.

If durability and performance characteristics are important to you, specify Gannon.
