# GANNON®

## ... the industry workhorse

Gannon is built on a tradition of reliability and performance, and is synonymous with construction-grade box scrapers. The Gannon reputation extends into our line of backhoe front loader and multi-purpose buckets as well as our extensive line of backhoe and compact excavator pin-on and quick change digging buckets.

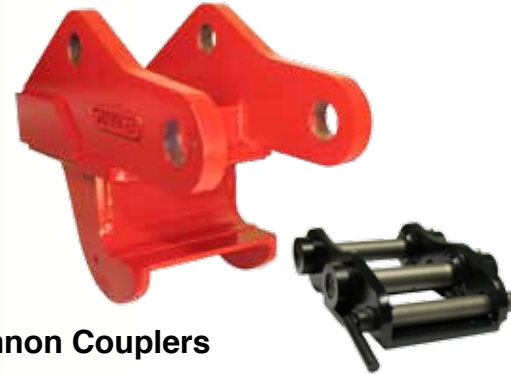

### Gannon Box Scrapers

- Heavy-duty hydraulic scrapers, 65" to 96" widths
- Hydraulically operated scarifier bar
- Category 1 & 2 hitch
- Double moldboard or tailgate design options

TLB Loader Bucket

### Gannon Couplers

- Gannon quick change coupler: "blank hook" design for attaching to the outside of the bucket - no tools required
- Gannon Eliminator manual quick coupler: simple and quick method to change buckets and attachments, with near zero loss of breakout force

Micro Mini Bucket

### Gannon Buckets

- **Multi-purpose loader buckets:** heavy-duty moldboard construction, hoses enclosed for added protection, pin-on or quick change mounting systems
- **General purpose TLB loader buckets:** for use with materials of a density range of 1,800 to 3,000 lbs/yd<sup>3</sup>, functional for light-duty needs and rugged enough for many heavy-duty applications
- **Compact excavator or TLB backhoe buckets:** pin-on or quick change, large selection of digging profiles, matches OEM specifications

# CENTRAL FABRICATORS®

## ... simply the best

Central Fabricators buckets are designed for easy material flow when loading and unloading the bucket. Buckets are designed to meet or exceed OEM specifications while improving machine versatility and jobsite productivity. All buckets are made with high strength steel, T-1 cutting edges and replaceable wear components.

To compliment our quality line of excavator and wheel loader buckets, Central Fabricators offers a complete line of quick couplers for host machines ranging from 2,500 lbs to 120 metric tons. These mechanical and hydraulic pin grabber couplers make attachment interchange "a snap", thus increasing the versatility and value of your fleet inventory of attachments.

### CF Excavator Bucket

- Internal struts and corner gussets for superior strength and rigidity without impeding product flow
- Designed to OEM pin-up specifications
- Side cutter insert and cutting edge notched for a larger, stronger, and more rigid attaching joint

### CF Wheel Loader Bucket

- Light material and multi-purpose
- Coupler and pin-on models
- Bolt-on cutting edge or tooth models
- Straight and spade nose edge designs

### CF Coupler Systems

#### Pin Grabber Coupler:

- Direct pin and quick latch models
- Available in both mechanical and hydraulic styles
- Optional jump latches adapt to any machine, any attachment, different MT size classes and competitive pin geometries

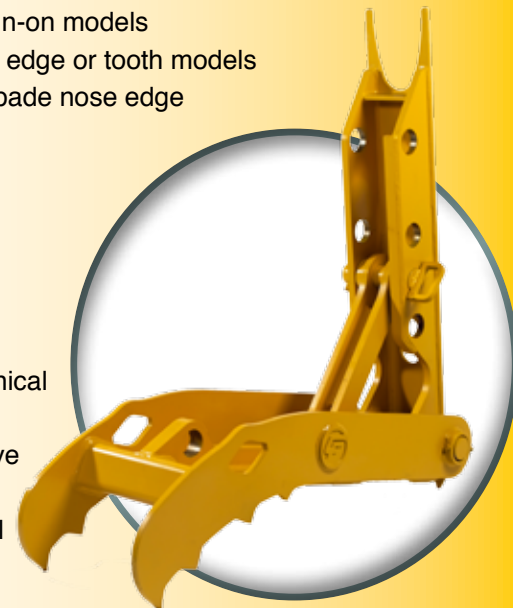

#### Wheel Loader Quick Coupler:

- Compatible for use on pallet forks, front-end loader and multi-purpose buckets
- Covering wheel loaders from 11,000 to 41,000 lbs gross weight

### Material Clamps

- Hydraulic or mechanical main pin
- Hydraulic progressive link main pin
- Weld-on mechanical and hydraulic

Heavy-Duty Buckets • Severe-Duty Buckets • Ditching & Grading Buckets  
Loader Buckets • Specialty Buckets

Box Scrapers • Quick Change Couplers

Excavator Buckets • Ditching & Grading Buckets • Ripper Buckets • Specialty Buckets  
Mining / Mass Excavation Buckets • Sand & Mass Loading Buckets • Wheel Loader Buckets

Manual & Hydraulic Quick Change Coupler Systems • Material Clamps  
Single Point Rippers • Grapples • Construction Utility Forks

# ALITEC™

...the industry standard in skid steer attachments

Alitec are highly versatile skid steer attachments that are adaptable to a wide variety of job environments including road repair, bridge deck repair, landscaping, municipal site prep and utility work.

## Alitec Augers

- (4) models rated from 15 to 45 gpm
- Motor/planetary gearbox design
- 2" hex or 2-9/16" round output shaft

## Alitec Rock Wheels

- Models from 12" to 24" cutting depths
- Double reduction planetary drives
- Depth and sideshift auxiliary functions
- Electro-hydraulic controls
- High-flow models

## Woods Pallet Forks

- Designed for use on skid steer loaders and compact tractors
- Universal quick-attach coupler system
- Free pivoting forged steel fork tine design

## Alitec Loader Buckets

- Low profile, long and short bottom construction buckets
- Utility and high-capacity, light material buckets
- Heavy-duty construction

# WAIN-ROY®

... often copied, never duplicated

Wain-Roy is recognized as the industry-leader in quick change coupler systems and is renowned for innovation and reliability. Wain-Roy couplers and attachments for backhoes and excavators increase the versatility of the prime movers, increase the construction job site productivity and increase "bottom line" financial results by minimizing the attachment fleet inventory.

Wain-Roy couplers are designed for use on compact excavators, tractor loader backhoes and excavators from 2,500 lbs to 25 metric tons.

- Patented XLS coupler system allows shimming to keep the connection to the attachment tight
- XLS system adds versatility by being able to pick up both XLS and Original-style attachments
- Rigid couplers are available in either manual or hydraulic pin release configurations
- Hydraulic swinger coupler with manual pin release provides additional attachment productivity when performing contouring work

## Wain-Roy Quick Coupler System

Increase machine productivity with no loss of breakout force. Available in either manual or hydraulic release and rigid or swinger designs.

## Wain-Roy Tilting Bucket

Ideal for ditch cleaning, grading, backfilling and loose material handling

## Wain-Roy Bucket With Hydraulic Thumb

Thumbs are used in conjunction with a bucket as an efficient method to handle bulk material

## Alitec Cold Planers

- Models from 12" to 40" milling widths
- Motor/planetary gearbox design
- Electro-hydraulic or manual-hydraulic control
- Standard and high-flow models
- Depth, side shift and tilt auxiliary functions
